AIP Publishing is a wholly owned not-for-profit subsidiary of the American Institute of Physics (AIP). Our mission is to support the charitable, scientific and educational purposes of AIP through scholarly publishing activities in the fields of the physical and related sciences on our own behalf and on behalf of our publishing partners. AIP Publishing’s portfolio of journals and conference proceedings provide scientists, engineers, researchers and students a foundation of interdisciplinary and emerging basic and applied research. Our flagship journals Applied Physics Letters, Journal of Applied Physics, and The Journal of Chemical Physics give rise to new techniques and offer inspiration to contemporary researchers. Other prestigious titles published cover plasmas, fluids, mathematical physics, instrumentation, and education.

George Mason University's Department of Bioengineering offers unique research and educational experiences with collaborative links to local Washington DC industry, national laboratories, institutes, and clinical centers. The BS program offers concentrations in Biomedical Imaging and Devices, Computational Biomedical Engineering, Biomaterials and Nanomedicine, Neurotechnology and Computational Neuroscience, Health Care Informatics, and Prehealth, and is ABET accredited. The MS program begun in 2018, offers both a research thesis option as well as an industry practicum. The PhD program offers full tuition and stipend support, and a unique translational program with a high level of flexibility. The department’s 13 faculty members have a growing $20M funding in the areas of Biomedical Imaging and Devices, Computational Biomedical Engineering, Biomaterials and Nanomedicine, and Neurotechnology and Computational Neuroscience. Our PhD program is tailored to accept students from both Engineering and Quantitative Sciences backgrounds as well students from the Biological Sciences by strengthening their current knowledge base and broadening it to include complementary skills needed to translate their research to clinical and industrial partners.

31 Center Drive, Room 1C14
Bethesda, MD 20892
Phone: 301-496-9208
Email: coneyjohnsons@mail.nih.gov
Web: http://www.nibib.nih.gov

The mission of the National Institute of Biomedical Imaging and Bioengineering (NIBIB) is to improve human health by leading the development and accelerate the application of biomedical technologies. The Institute is committed to integrating the physical and engineering sciences with the life sciences to advance basic research and medical care. Stories of exciting research breakthroughs are told through video and web content at www.nibib.nih.gov. In addition to funding research, NIBIB supports a broad range of training programs from undergraduate to post-doctoral students. These programs are designed to support researchers throughout the career continuum, increase the number of clinician-scientists, and enhance the participation of underrepresented populations in biomedical imaging and bioengineering research.

National Science Foundation (NSF)

Web: www.nsbe.org

With more than 600 chapters and more than 24,000 active members in the U.S. and abroad, the National Society of Black Engineers (NSBE) is one of the largest student-governed organizations based in the United States. NSBE, founded in 1975, supports and promotes the aspirations of collegiate and pre-collegiate students and technical professionals in engineering and technology. NSBE’s mission is “to increase the number of culturally responsible black engineers who excel academically, succeed professionally and positively impact the community.” For more information, visit www.nsbe.org

The Department of Biomedical Engineering at NJIT offers bachelor's, masters and doctoral degrees. We have a strong research program that provides ample opportunity for undergraduate research. All of our tenured and tenure-track faculty are very active in research. We have developed research expertise in neural and neuromuscular engineering, rehabilitation engineering, traumatic brain injury and tissue engineering/regenerative medicine. Our Ph.D. program is a joint program with the New Jersey Medical School of Rutgers University.

NYU graduate engineering programs exist in the fields of mechanical, civil, urban, industrial, electrical, computer, chemical, biomedical and financial engineering alongside programs in computer science, management of technology, cybersecurity, and integrated digital media. Our goal is to produce highly desirable graduates prepared for industry. This has led us to be one of the top ranked schools in the nation with regards to graduate employability, salary potential and return on investment.

The College of Engineering offers more than 40 degree and certificate opportunities including Master of Science and Doctor of Philosophy that prepare students for technical and leadership positions. Industry-aligned Master of Science degrees are also offered for working professionals or recent engineering graduates. These multidisciplinary degrees are designed for different industry sectors, while graduate certificates provide the opportunity to develop a specialization in a specific area as well as provide a pathway to a master's degree in Northeastern's College of Engineering. Programs are offered at the Boston, Seattle and Silicon Valley campuses. Research and cooperative education opportunities, esteemed faculty, professional and social campus organizations, and a strong alumni community enhance the academic experience and enable students to expand their knowledge while building lifelong professional and personal networks.

The University of Calgary’s multidisciplinary Engineering Solutions for Health: Biomedical Engineering research strategy drives innovations that are saving lives and revolutionizing health care for Canadians. More than 330 faculty members are clustered in collaborative teams that focus on regenerative medicine, human mobility, health monitoring, advanced biomedical imaging, precision diagnostics and novel medical technologies. State-of-the-art facilities and a rich interdisciplinary environment that spans the faculties of Medicine, Engineering, Science, Veterinary Medicine, Kinesiology and Nursing, provide an ideal setting for research and for training our 260 undergraduate and graduate students and 200 post-doctoral fellows currently supervised by BME faculty. Formally, we offer two training programs: an undergraduate minor program in engineering, which includes the option of an internship in the fourth year, and a graduate program for MSc and PhD candidates. Furthermore, as residents of Canada’s most innovative city, faculty and students have access to a wealth of resources that will help launch innovations to commercialization including hackathon competitions, entrepreneurship training and translation facilities. From concept to the clinic and back, our
researchers are transforming quality of life and continuously improving the health system. Find out more at https://www.ucalgary.ca/bme/.

The mission of UC Irvine’s Department of Biomedical Engineering to inspire engineering minds to advance human health. We are located at a premier research university deep in the heart of the nation's biomedicine and biotechnology capital, straddling Orange and San Diego Counties. Uniquely positioned within this ecosystem and building upon our research and teaching strengths, we train students for 21st century jobs in industry, academia, and healthcare. Our research strengths are in biophotonics (spearheaded by the world-renowned Beckman Laser Institute), tissue engineering, biomedical micro-/nano-scale systems, cardiovascular engineering, biomolecular/genetic engineering and neuroengineering. We have strong ties to the UC Irvine’s School of Medicine, in particular with the Institute for Clinical and Translational Science and Chao Family Comprehensive Cancer Center.

Booth # 611

UC San Diego is at the forefront of bioengineering. We broadly categorize our research interests as: Cell and Molecular Bioengineering, Multiscale Bioengineering, Tissue Engineering and Regenerative Medicine, Clinical Bioengineering and Imaging, and Systems Biology and Medicine. Our department has disease focus areas that include Cancer, Cardiovascular Diseases, Metabolic Disorders, Orthopedic Injury, Shock, Multiorgan Failure, and Neurodegenerative Diseases.
The Center for BioEngineering (CBE) at UC Santa Barbara is a hub for research and teaching at the interface of biology, engineering and physical sciences. It builds on UC Santa Barbara’s strengths in biophysics, biomaterials, biomolecular discovery, and computational and experimental systems biology, enabling fundamental scientific discoveries to be transitioned to applications in medicine and biotechnology. CBE currently offers a graduate emphasis in Bioengineering for PhD students that fosters cross-disciplinary innovation and collaboration with 13 participating departments across campus. Visit our website or drop by our booth to learn about our program.

Booth # 735
University of Colorado Boulder
Department of Chemical and Biological Engineering
3415 Colorado Avenue
596 UCB, Room A125A
Boulder, CO 80309
Phone: 303-735-1975
Email: chbegrad@colorado.edu
Web: www.colorado.edu/chbe/

We are a world-class department with 27 faculty, 50 postdoctoral fellows, 134 graduate students, and more than 650 undergraduate students. Our research program is extremely active, with vibrant research efforts in biomaterials, tissue engineering, biotechnology, nanotechnology, Synthetic Biology, pharmaceuticals, and soft materials. Our strong graduate program emphasizes the PhD degree.

Booth # 742
University of Colorado Denver / Anschutz Medical Campus
Department of Bioengineering
12705 E. Montview Blvd., Suite 100
Aurora, CO 80045
Phone: 303-724-5893
Email: bioengineering@ucdenver.edu
Web: engineering.ucdenver.edu/academics/departments/bioengineering

The Bioengineering program at CU Denver welcomes undergraduate, master and PhD students. Our students learn and perform research or medical device design in world-class hospitals and clinical research labs. Our research focus areas: tissue engineering, neuroscience, assistive technology, biomedical device design, entrepreneurship, regulatory affairs and clinical imaging.

Booth # 820
University of California, Santa Barbara
1104 BioEngineering Building
Santa Barbara, CA 93106
Phone: 805-893-2764
Email: elizabeth.jensen@engineering.ucsb.edu
Web: bioengineering.ucsb.edu

The Pritzker School of Molecular Engineering PhD program equips students with engineering principles to analyze and design molecules for emerging applications, taking research beyond the boundaries of traditional engineering fields. Students work closely with faculty and peers in combining problem-solving skills with broad scientific expertise to build useful systems from the molecular level up.

Booth # 834
BME University of Cincinnati
2901 Woodside Drive, S01 ERC
Cincinnati, OH 45221
Phone: 513-556-8420
Email: hallemirr@uc.edu
Web: http://ceas.uc.edu/academics/departments/biomedical-engineering.html

UC’s BME prepare students to excel and lead in the 21st century. Our course work is designed to help students to develop new procedures and devices to solve medical and health related problems; design surgical instruments, artificial organs, prosthetics, and care delivery systems; and study the forces, motions, shape changes and failure of biological tissues and organ systems through biomechanics.

Booth # 440
The University of Chicago
Institute for Molecular Engineering
5640 South Ellis Avenue, ERC 299
Chicago, IL 60637
Phone: 773-834-2290

The mission of UConn BME is to rigorously educate our students in diverse fields of biomedical engineering by building on a strong foundation in engineering, mathematics, and biology, and to include a core competency in a specific area of bioengineering. The faculty has a wide range of research expertise with strengths in the following research areas: imaging, biosensors and instrumentation, molecular, cellular and tissue engineering,
biomechanics, neural and rehabilitation engineering, and bioinformatics.

Booths # 435 / 437

University of Delaware
150 Academy Street
161 Colburn Lab
Newark. DE 19716
Phone: 302-831-4578
Email: delliott@udel.edu
Web: www.bme.udel.edu

University of Delaware’s Biomedical Engineering Department welcomes undergraduate and graduate students who are intellectually motivated, creative, and diverse individuals to join us. Our research focus areas: Musculoskeletal and Neural Engineering; Cancer Diagnosis and Therapy; Disease Modeling; Tissue and Regenerative Engineering.

Booth # 415

University of Florida
J. Crayton Pruitt Family Department of Biomedical Engineering
1275 Center Drive, JG-56
Gainesville, FL 32611
Phone: 352-273-9222
Email: info@bme.ufl.edu
Web: www.bme.ufl.edu

The J. Crayton Pruitt Family Department of Biomedical Engineering at the University of Florida (UF BME) is dedicated to developing innovative and clinically translatable biomedical technologies, educating future generations of biomedical engineers, and cultivating leaders, by nurturing integration of engineering, science, and healthcare in a collaborative and dynamic educational and research environment. UF BME is one of only a few departments nationally to be co-located with a top-ranked medical school, veterinary school, and dental school, along with having a strong culture of entrepreneurship and commercialization.

Booth # 700

University of Georgia
597 D.W. Brooks Drive
Athens, GA 30602
Phone: 866-ENHR-UGA
Email: info@engr.uga.edu
Web: http://engineering.uga.edu/cmbe

The University of Georgia School of Chemical, Materials and Biomedical Engineering offers unique, interdisciplinary programs to support development of creative solutions for human health and wellness. A vibrant academic environment exists that fosters engineering education in a liberal arts environment and research that addresses critical societal needs.

Booth # 349

University of Houston
Department of Biomedical Engineering
3517 Cullen Boulevard
Houston, TX 77204
Phone: 832-842-8813
Email: ckwaits@uh.edu
Web: http://www.bme.uh.edu

The University of Houston Department of Biomedical Engineering seeks to develop national and global leadership in academia, government, and industry by building graduate and undergraduate programs emphasizing global scientific, social, and cultural interaction to meet the demands of the dynamic, ever-changing global healthcare economy. Today our research areas span three primary areas: (1) Neural, Cognitive, and Rehabilitation Engineering, (2) Biomedical Imaging, and (3) Bionanoscience.

Booth # 430

University of Illinois at Chicago

One of the first degree granting and accredited Bioengineering programs in the nation, since 1965 UIC Bioengineering offers B.S., M.S., Ph.D., M.D./M.S. and M.D./Ph.D. programs that emphasize translational research and innovative training that can include clinical immersion and industry-linked interdisciplinary medical product development. UIC was recently ranked #7 in the nation for best value by the Wall Street Journal and #9 in the nation for diversity by US News and World Report. UIC is also consistently ranked among the top 100 safest campuses in the nation. It is located in the heart of Chicago, home of 5 major academic medical centers, multiple Fortune 500 healthcare companies, and a thriving med and bio tech startup culture. UIC Bioengineering takes advantage of all that Chicago has to offer to prepare its students for their next step whether it be industry, small or big, graduate school or a postdoctoral position, medical school or other professional opportunities.
The first Bioengineering department in the country to receive a multi-million-dollar NSF RED grant to revolutionize its undergraduate curriculum, Illinois Bioengineering provides its students with immersive, needs-focused courses that prepare them to address real-world biomedical problems with innovative ideas and solutions. We offer B.S., M.S, M.Eng, and Ph.D. degrees. Our faculty helped create the curriculum for the new Carle Illinois College of Medicine, the world’s first engineering-based college of medicine. They also continue to break new ground in bioimaging at multi-scale; bio-micro and nanotechnology; computational and systems biology; molecular, cellular and tissue engineering; and synthetic bioengineering research. Illinois Bioengineering is located in the newly renovated Everitt Lab, which also houses the $10 million Jump Simulation Center, a place where Carle Illinois medical students train in various settings, including an operating room, intensive care unit, and hospital/clinic patient rooms. Bioengineering is also integrating the Simulation Center into our laboratory courses, senior design projects, and technology transfer efforts.

Booth # 740

University of Iowa

Roy J. Carver Department of Biomedical Engineering
5601 Seamans Center
Iowa City, IA 52242
Phone: 319-335-5632
Email: bme@engineering.uiowa.edu
Web: www.engineering.uiowa.edu

The Roy J. Carver Department of Biomedical Engineering, founded in 1974, was one of the original BME programs in the country. The Department enjoys well-established collaborations with a nationally ranked hospital, providing our students and researchers the opportunity to work alongside clinicians to develop biomedical innovations that have a translatable impact in healthcare. The faculty’s primary research areas are biomedical imaging, biomaterials, cardiovascular biomechanics, mechanobiology, regenerative and tissue engineering, computational genomics, and musculoskeletal biomechanics. We are recruiting PhD and Post-doctoral fellows for a new NIH-funded T32 training program focused on Quantitative Lung Imaging. We are also seeking applications for a faculty position in Respiratory and Pulmonary Bioengineering. Visit booth #740 for more info.

Booth # 420

The University of Kansas

1536 West 15th Street, LEEP2 1415
Lawrence, KS 66045
Phone: 785-864-5258
E-mail: bioe@ku.edu
Web: http://bio.engr.ku.edu/

Make your voice heard with KU Bioengineering! Our program is broad and flexible, embracing the interdisciplinary nature of the field and specializing in translational research. With six tracks; Biomedical Product Design & Development, Biomechanics & Neural, Biomolecular, Biomaterials & Tissue, Bioimaging, and Computational Bioengineering; and a collaboration with The University of Kansas Medical Center, students customize their education and create a niche of research before they enter the job market. Inquire today. Let us help you achieve your career goals.

Booth # 428

University of Kentucky

Biomedical Engineering Department
522 Robotics-Manufacturing Building
143 Graham Avenue
Lexington, KY 40506
Phone: 859-257-8101
Email: bmedgs@uky.edu
Web: www.engr.uky.edu/bme

The Biomedical Engineering Program at the University of Kentucky (UK) offers life-enriching learning experience in a clinical immersive environment for biomedical engineers who will lead in engineering the future of medicine through scientific discovery, translational research, and innovation that improves medicine and healthcare. Pursuing BME degrees and certificates at UK, students and trainees will be empowered by design-thinking, entrepreneurial savviness, and regulatory awareness.

Booths # 414 / 416

University of Louisville & Abu Dhabi University

Department of Bioengineering

Lutz Hall Suite 419
Louisville, KY 40292
Phone: 502-852-7485
Email: nancy.hansford@louisville.edu
Web: http://louisville.edu/speed/bioengineering

The Department of Bioengineering at the University of Louisville (UofL) focuses on translational research and is the only Bioengineering Program to receive Coulter Translational
Partnership, NSF i-Corps, NSF AWARE:ACCESS, and NIH ExCITE REACH awards. Our faculty and students have developed and translated new medical devices and therapies, in addition to contributing to basic science and understanding. Areas of emphasis include biomedical devices, micro- and nano-scale electro-biomechanical systems, nano-therapeutics, cellular and tissue engineering, biomaterials, medical imaging, and artificial intelligence in medicine.

UofL Bioengineering programs include a doctoral program in Translational Bioengineering, Master of Science and Master of Engineering, Bachelor of Science, and a Certificate in Artificial Intelligence in Medicine. In partnership with the University of Louisville, Abu Dhabi University (ADU) is offering a Biomedical Bachelor of Science program for students in Dubai. ADU has an internationally acclaimed bio-imaging research program with a focus on artificial intelligence, wearable devices, mobile applications, and the Internet of Things in healthcare.

Booth # 315 / 317
University of Maryland
Fischell Department of Bioengineering
8278 Paint Branch Drive
College Park MD 20742

Web: www.bme.miami.edu

We offer undergraduate and graduate programs leading to the B.S., 5 year B.S./M.S, M.S and Ph.D. degrees. Our curricula prepare graduates to solve problems at the interface of engineering and life sciences. Special features of our program include small class size, a dynamic and research-active faculty, integration with the University of Miami Miller School of Medicine, high level of student-faculty interaction, and a high percentage of undergraduate student participation in research and professional activities. The research areas of our Faculty include imaging, optics and lasers; neural engineering, signals and instrumentation; and biomechanics, biomaterials and tissue engineering. The MS program provides an opportunity to focus on medical physics, neural engineering, or tissue engineering.

Booth # 600
The University of Michigan

U-M BME is continually building upon a 50+ year tradition of excellence and a strong partnership as a joint department between Michigan Engineering and the U-M Medical School, fostering collaboration between engineers and clinicians to solve challenges in healthcare. U-M BME is a leader in regenerative medicine, imaging & biophotonics, micro- and nanotech & molecular engineering, neural engineering, biomechanics, engineering education and computation & modeling. We reach across disciplines and translate technologies from the lab to patients and healthcare providers. Our newly reimagined curriculum and pioneering design program give students the tools necessary to invent the next generation solutions in healthcare and beyond.

The UofSC Biomedical Engineering Program is a collaborative effort between the College of Engineering and Computing and the School of Medicine, which features research in biomechanics, tissue engineering, drug development and delivery, biomonitoring and biomeasurements, and biomaterials. The program offers three graduate degrees, including research-based MS and PhD degrees as well as a coursework-based ME degree. These degree programs are designed around the goal of training students to imagine, integrate, and invent new products and processes that will improve human health. Attracted by some of the best graduate programs in the nation, more than 6,200 graduate students call Carolina their academic home. Located in Columbia, the state capital of sunny South Carolina, it combines the benefits of a big city with the charm and hospitality of a small town. Residing only hours from both the Blue Ridge Mountains and the Atlantic Coast beaches, this area provides plenty of opportunities for year-round outdoor recreation.

Nestled in the towering Wasatch mountain range 20 minutes from Salt Lake International Airport, the Department of Biomedical Engineering at the University of Utah prepares graduates to be global leaders in biomedical research, industry, education, medical device design and development, and scholarship. We focus expertise on relevant topics, issues, and challenges at the intersection of engineering, biology, and medicine. The program is closely connected with the University of Utah’s flagship School of Medicine and Health sciences with a strategic focus on a biomedical mission that benefits our students, the med-tech industry, healthcare technology, and patients worldwide through meaningful biomedical advancements, creative design and innovation. Faculty research areas in the department include biomaterials, tissue engineering and regenerative medicine; biomedical device design and development; biomechanics; biomedical imaging, computing, modeling and visualization; biosensors, biomolecular engineering and synthetic biology; cardiovascular engineering; neural engineering and neuroprosthetics; and new drug delivery strategies.

Web: http://bme.virginia.edu

Using our perspective as engineers, we make groundbreaking discoveries in fields like systems biology and biomedical data sciences, medical imaging, and cellular and tissue engineering. We are co-located in the medical school, and our department’s remarkable tendency toward collaboration reflects a culture of cooperation that has been essential to UVA going all the way back to Thomas Jefferson.

Booth # 210
University of Washington
Department of Bioengineering
3720 15th Avenue NE, N107
UW Mailbox 355061
Seattle, WA 98105
Phone: 206-685-2000
Email: kaleic@uw.edu
Web: bioe.uw.edu

The University of Washington is a world leader in bioengineering research, education, clinical application, technology transfer and service. Please visit our booth 210 to discover how we are inventing the future of medicine. Our faculty, staff and students are eager to talk to you!
Booth # 211
The University of Wisconsin - Madison
Department of Biomedical Engineering
1550 Engineering Drive
Madison, WI 53706
Phone: 608-263-4660
Email: info@bme.wisc.edu
Web: https://www.bme.wisc.edu

Be a part of something bigger. At the University of Wisconsin—Madison we’re guided by the Wisconsin Idea—our pledge to the state, nation, and world that our endeavors will benefit everyone. Through our interdisciplinary programs, students, faculty, and staff collaborate to have significant, far-reaching impacts on human health.

Booths # 509 / 511
Vanderbilt University
Biomedical Engineering
5824 Stevenson Center Drive
Nashville, TN 37235
Phone: 615-343-1099
Email: tina.shaw@vanderbilt.edu
Web: www.vanderbilt.edu

VU BME bridges Vanderbilt’s engineering, basic science departments, and a Top 10 School of Medicine, and is located in a vibrant, destination city. Research strengths include biomaterials and drug delivery, bioMEMS and organs-on-a-chip, biophotonics, image-based technologies and modeling, mechanobiology, and nanomedicine. VU BME stimulates high impact research and provides unique educational opportunities.

Booth # 535
Vanderbilt School of Medicine
Medical Innovators Development Program
2209 Garland Avenue
Nashville, TN 37240
Phone: 217-741-0006
Email: ali.c.coffey@vanderbilt.edu
Web: https://medschool.vanderbilt.edu/midp/

The Medical Innovators Development Program (MIDP) is a unique four-year Ph.D. to MD training program tailored to engineers and applied scientists with existing Ph.D. degrees. The purpose is to fill an unmet need for applied physician-engineers who can solve clinical problems by translating discoveries in engineering into valuable innovation that will improve the lives of our patients. Our mission is to improve human health by transforming Ph.D. leaders into empathic physician innovators. Motivated innovative physician-engineers who understand clinical medicine, as well as biomedical design, are critical to achieving more than incremental change. The MIDP is the school of medicine’s first step in a broader mission to bridge the gap between academia, industry, and health.

Booth # 305
Villanova University
Graduate Engineering
800 East Lancaster Avenue
Villanova, PA 19085
Phone: 610-519-3962
Email: engineering.grad@villanova.edu
Web: http://www1.villanova.edu/villanova/engineering/departments/che.html

Offering full-time, part-time, on campus and online options, the College of Engineering provides the flexibility to accommodate student needs. Those interested in full-time graduate study benefit from a hands-on, collaborative research environment and one-on-one faculty mentorship. Villanova doctoral students lead research, work with industry partners and pursue their passions in solving some of the world’s greatest challenges. Degree offerings include a PhD in Engineering, master’s degrees in Chemical Engineering, Biochemical Engineering, Mechanical Engineering and Sustainable Engineering (and several others), and more than 15 graduate certificates.

Booths # 235 / 237
Virginia Commonwealth University
601 W. Main Street
Richmond, VA 23284
Phone: 804-828-7958
Email: biomedcalengr@vcu.edu
Web: https://egr.vcu.edu/departments/biomedical/

VCU Biomedical Engineering has strong ties with the VCU Schools of Medicine, Dentistry, and Pharmacy and Massey Cancer Center, and offers Bachelor’s, Master’s, and Doctoral degrees. Research specialties include mechanobiology, regenerative medicine, biomechanics, rehabilitation engineering, biomaterials, computational medicine, and imaging.
Booths # 508 / 510

Washington University in St. Louis
One Brookings Drive
St. Louis, MO 63130
Phone: 314-935-6164
Email: teasdalek@wustl.edu
Web: http://bme.wustl.edu/

In partnership with our world-class medical school and as part of a $550M research enterprise in life sciences and biomedical research, the Department of Biomedical Engineering at Washington University provides unparalleled opportunities for interdisciplinary, basic science and translational research training at the BS, MS and PhD level. More than 90 research mentors support over 140 BME PhD students in studies of regenerative medicine, imaging, cell and molecular systems, cardiovascular, neural, and orthopedic engineering. With adjacency to the largest public park in the USA, and over 75,000 sq. ft. of state-of-the-art facilities, the BME Department at Washington University provides the ideal intellectual, physical and collaborative climate to pursue a BS, MS, MEng, MS/MA, PhD or MD/PhD degree.

Booth # 610

Wayne State University
818 W. Hancock
Detroit, MI 48201
Phone: 313-577-1344
Email: nmurthy@wayne.edu
Web: www.bme.wayne.edu

The Biomedical Engineering Department at Wayne State University offers BS (including dual degree options with Mechanical Engineering and Electrical Engineering), Bridge Certificate in Injury Biomechanics, MS, PhD and MD/PhD degrees. It is involved in some of the most advanced research in the field. Our faculty have made significant contributions in automotive safety and the prevention of sports-related and military injuries. Groundbreaking research is also being conducted in the development of tissue-engineered nerves and heart valves as well as imaging techniques for improved diagnosis of brain injury and cancer. Our research has led to improvement in the standards of the automotive industry, better protective equipment for our soldiers and athletes, new techniques to repair damaged tissue and improved diagnostic imaging of trauma and disease.

Booth # 232 - Canadian Pavilion

Western University
School of Biomedical Engineering
1151 Richmond Street
London, Ontario N6A 3K7 Canada
Phone: 519-661-4288
Email: bmeoffice@uwoc.ca
Web: www.eng.uwo.ca/biomed/

The School of Biomedical Engineering at Western University promotes teaching and research collaborations among more than 90 professors from Western’s Faculties of Engineering, Health Sciences, and Science and the Schulich School of Medicine and Dentistry. Our students and faculty focus on research challenges that bridge our four technology pillars: biomaterials, biomechanics, imaging, and mechatronics. We provide multidisciplinary training opportunities to undergraduate, Master’s, and doctoral students that emphasize exposure to real-world clinical problems and development of professional skills that are relevant to careers in industry, academia, and government.
Exhibitors

As of 10/9/19 - Page 28 of 28

Booth # 550
Woodrow Wilson National Fellowship Foundation
5 Vaughn Drive, Suite 300
Princeton, NJ 08540
Phone: 609-945-7852
Email: ndiba@woodrow.org
Web: www.woodrow.org

The Woodrow Wilson Teaching Fellowship seeks to attract talented, committed individuals with backgrounds in the STEM fields into teaching in high-need secondary schools in Pennsylvania. Eligible applicants include current undergraduates, recent college graduates, midcareer professionals, and retirees who have majored in one or more of the STEM fields.

Booths # 343 / 345
Worcester Polytechnic Institute
100 Institute Road
Worcester, MA 01609
Phone: 508-831-5301
Email: grad@wpi.edu
Web: www.grad.wpi.edu

Graduate students in WPI’s Biomedical Engineering (BME) Department collaborate with scientists and engineers across disciplines, seeking breakthroughs in injury and rehabilitative biomechanics, innovations in regenerative medicine and quantitative microscopy, and major steps forward in healthcare. Whether in the classroom or the lab, the focus is on making an impact and solving real-world problems. WPI’s BME graduates have gone on to rewarding careers at major medical and biomedical research centers across academia, government, and the medical device industry.

Booth # 328
Yale University
55 Prospect Street
New Haven, CT 06511
Phone: 203-432-4262
Email: deanna.lomax@yale.edu
Web: www.seas.yale.edu/departments/biomedical-engineering

The booth will be staffed with graduate representatives and faculty from the department of Biomedical Engineering at Yale. The faculty and graduate representative will aim to describe the program to interested visitors and answer any questions regarding the program requirements and admissions process.
