The mission of the School of Biological and Health Systems Engineering at ASU is to create novel solutions to improve human health through research, education, and service to the community. The faculty in SBHSE has a wide range of research expertise with strengths in the following research areas: imaging, biosensors and instrumentation, molecular, cellular and tissue engineering, neural and rehabilitation engineering, synthetic biology and systems bioengineering.

Booth # 330

Binghamton University

Department of Biomedical Engineering

P.O. Box 6000

Binghamton, NY 13902

Phone: 607-777-5774

Email: tglezen@binghamton.edu

Web: www.binghamton.edu/bme

The Binghamton University Department of Biomedical Engineering provides a state-of-the-art, affordable education. We train the next generation of biomedical engineers, cultivate leaders, and foster entrepreneurship through the integration of engineering principles, medical science, and biology towards an improved understanding of biophysical phenomena, healthcare systems, disease prevention, diagnostics, and treatment.

Case Western Reserve University

10900 Euclid Avenue, Wickenden 340

Cleveland, OH 44106

Phone: 216-368-4094

Email: bmedept@case.edu

Web: <http://bme.case.edu/>

The Department of Biomedical Engineering at Case Western Reserve University offers distinctive programs ranging from the B. S. degree through the Ph.D. degree, including our innovative M.D./Ph.D. degree, M. D./M.S. degree, and our Biomedical Entrepreneurship program. Cutting-edge research thrusts include: biomaterials and tissue engineering, neural engineering and neuroprostheses, biomedical imaging and sensing, transport and metabolic engineering, biomechanics, and targeted therapeutics.

Booth # 121

Center for Multimodal Evaluation of Engineered Cartilage

Case Western Reserve University

2102 Adelbert Road

A.W. Smith 141C

Cleveland, OH 44106

Phone: 216-368-1029

Email: hari@case.edu

Web: <http://ccmeec.case.edu/>

The Center provides a nexus of capabilities where academic and industrial researchers from local, national, and international labs can access information, obtain assistance and training with planning and methods, and utilize specialized facilities to evaluate their engineered tissues. The Center provides “one-stop shopping” of technologies for comprehensive, multimodal evaluation of engineered tissue with emphasis on the following areas:

- Imaging, cell biology and metabolism, and mechanical characterization.
- Non-contact, non-destructive longitudinal testing.
- Exhaustive destructive testing for validation purposes.

Booth # 808

Welcome to the University of Arizona Biomedical Engineering Program located in the picturesque Sonoran Desert of Southern Arizona! UA Biomedical Engineering provides a rigorous education in the time-tested principles, technologies and tools of engineering combined with broad exposure to the ever-expanding modern practice of biomedicine. Our highly interdisciplinary program at a **top-50** public national research

institution is an ideal choice if you are seeking a collaborative environment tailored to your interests and career goals. We have more than 50 esteemed faculty, many of whom have multiple appointments in the colleges of engineering, medicine and science, who specialize in areas ranging from cardiology to medical imaging. Join University of Arizona Biomedical Engineering!

260 Glenbrook Road
Storrs, CT 06269
Phone: 860-486-5838
Email: ki.chon@uconn.edu
Web: www.bme.uconn.edu

The mission of UConn BME is to rigorously educate our students in diverse fields of biomedical engineering by building on a strong foundation in engineering, mathematics, and biology, and to include a core competency in a specific area of bioengineering. The faculty has a wide range of research expertise with strengths in the following research areas: imaging, biosensors and

instrumentation, molecular, cellular and tissue engineering, biomechanics, neural and rehabilitation engineering, and bioinformatics.

The J. Crayton Pruitt Family Department of Biomedical Engineering at the University of Florida (UF BME) is dedicated to developing innovative and clinically translatable biomedical technologies, educating future generations of biomedical engineers, and cultivating leaders, by nurturing integration of engineering, science, and healthcare in a collaborative and dynamic educational and research environment. UF BME is one of only a few departments nationally to be co-located with a top-ranked medical school, veterinary school, and dental school, along with having a strong culture of entrepreneurship and commercialization.
