BMES Announces Health Disparities Keynote, Fred D. Gray

We invite you to attend our Health Disparities & Racial Justice Session, led by civil rights attorney, preacher, and

BMES member, Kagya Amoako, PhD, has created a BME Symposium

The "Frontiers of Biomedical Innovation" symposium offers students opportunities to learn about the latest technology
activist Fred D. Gray, Sr. He’s been instrumental in so many civil rights cases and, thanks to the generosity of BMES members Jerry and Sandra Collins, we are excited to welcome and hear him share his experiences with #BMES2020 attendees.

BMES Program & Agenda

Gladstone Institute study gives insight into how COVID-19 causes heart damage

Gladstone Senior investigators Todd McDevitt, PhD, and Bruce Conklin, MD, led the study in collaboration with Melanie Ott, MD, PhD. The team’s findings show the virus’ unexpected effects on the structure of heart cells in the lab, as well as in heart tissue from COVID-19 patients.

Matt Loeb receives the Herbert Voigt Distinguished Service award

This award is presented to members who demonstrate extraordinary service to the society through volunteering and leadership, participation, and much more. The BMES Board of Directors named Matt Loeb, former BMES Interim Executive Director, this year’s winner.
